1. Discuss the symptoms, causes, and treatments of schizophrenia. Speculate on the effects this illness has on families.

2. A family you know has recently had one of their members diagnosed with schizophrenia. Explain to them what you know about the diathesis stress model for understanding the development of the disease.

3. Become one of the psychoses other than Schizophrenia (from the top of the mind map). Discuss your symptoms and the impact you’ll have on your host and their family.
