Focus Questions

1. Become one of the Major or Mild Neurocognitive disorders. Describe your symptoms, progression, causes and treatments? What can you tell a family about their future living with you?

2. You’ve been asked by the local Commission on Aging to prepare a presentation on the types and symptoms of Delirium. What would you present (take special care to distinguish it from Dementia)?

3. What can you tell a group of senior citizens about depression, anxiety, and sleep problems in members of their age group?
